**Subject:** Fwd: Fruitland Magnesium Fire Incident - Info

Michelle/Jason - I just finished briefing Enrique and believe I captured all the main points as we discussed.

Harry/Dan- Michelle and Jason are preparing a written protocol that they will e-mail to this group later today.

Mostly good news, the UC and public health working group have agreed to a path forward, action level(s), and process with maybe just a few minor issues to still tie off. Instead of me attempting to litter your inbox with my attempt at that summary, best we wait for what our field osc's produce here in a little bit.

Michelle - you are good to go if want PIAT, but Enrique will insert himself to make sure you get what you want regionally if possible.

Jason reports that we look to be OK from an OSC staffing standpoint for this first phase (residential matters). Michelle can return for few days after the holiday if desired. I will continue to try and support Tom with staffing needs decisions next week. Currently, there is adequate capacity on the START TDD for Jason to requisition what he will need.

Enrique is aware that the action memo that he will likely sign next week will require a simple re-work and probably extra money for the second phase (actual fire site) but nobody is too worked up about that right now.

I suggested that we probably did not need to correspond again until Monday but if anyone wants a specific answer that today's summary may not address, Michelle and Jason are fine with being contacted directly.

Finally, as you can imagine, Enrique is very appreciative of the effort.

Have a good rest of the weekend.....CB
